CAREER OBJECTIVE

Final-year B.Tech (IT) student with strong CS fundamentals — DSA, OOP, and system design — backed by 500+ solved problems and shipped projects. Comfortable across Java, JavaScript; quick to learn unfamiliar systems and codebases through independent research and mentorship.

EDUCATION

B.Tech in Information Technology	2023 – 2027
Jaipur Engineering College and Research Centre, Jaipur	CGPA : 8.8

SKILLS

Languages :	Java, JavaScript, SQL
Fundamentals :	Data Structures & Algorithms, OOPs, System Design, DBMS, SDLC
Backend & APIs :	Spring Boot 3, Node.js, Express.js, RESTful APIs, JWT
Databases :	MySQL, MongoDB
DevOps & Testing :	Git, GitHub, Docker, CI/CD (GitHub Actions), Postman, JUnit

EXPERIENCE

Full Stack Developer Intern	May 2026 – Present
Yinolite Solution	MERN Stack

- Independently developed and maintained 9+ secure REST API endpoints with JWT-based role-based access control across Auth, Job, and Application modules, learning the existing codebase and conventions with minimal onboarding.
- Participated in code reviews and incorporated mentor and peer feedback following OOP and software engineering best practices, contributing to higher consistency and maintainability across the team's codebase.
- Modeled a 3-collection MongoDB schema with advanced aggregation pipelines and multi-field indexing; wrote integration and regression test suites to verify behaviour and catch edge cases before production.

PROJECTS

MindVault : Journal Management System → [Github]	Java, Spring Boot, MongoDB, Kafka, Gemini API
---	---

- Built a scalable backend using Core Java and Spring Boot with MVC architecture and SOLID principles; investigated and resolved gaps in an existing codebase — including missing CORS config, unprotected admin routes, and broken error reporting — demonstrating independent ability to navigate and reason about unfamiliar systems.
- Picked up event-driven architecture from scratch, integrating Kafka for real-time sentiment analysis via Gemini Flash API with a local lexicon fallback for reliability, and set up an automated CI/CD pipeline via GitHub Actions.
- Documented and tested 8+ stateless REST APIs with Postman integration testing; compound index optimizations reduced data retrieval latency by 25%.

Skill-Bridge : Job Portal System → [Github] [LIVE]	MERN Stack
---	------------

- Designed and developed a full-stack job portal using the MERN stack with JWT and Google OAuth 2.0, implementing role-based dashboards for recruiter and candidate workflows — deployed live and tested end-to-end as a solo project.
- Integrated Cloudinary for resume uploads; performed regression testing ensuring zero ingestion failures across the full application lifecycle.

ACHIEVEMENTS & CERTIFICATIONS

- Solved **400+** problems on LeetCode and GeeksForGeeks with strong focus on Trees, Dynamic Programming, and Graphs — core computer science fundamentals applied to algorithmic problem solving.
- Completed Java Development Certification [\[Certificate\]](#)
- Published a peer-reviewed research paper in **Pratibodh** on the Impact of Technology on Education and Learning [\[Paper\]](#).
- Organized the **Knowledge Knockout** tech fest (2024 & 2025), managing cross-functional team coordination, stakeholder communication, and end-to-end event execution.
